WORKS OF J. WALKER, LL.D.
CRITICAL
Dictionary of the English Language
BY JOSEPH E. WORCESTER, LL. D.
New York, No. 20, N. 20, 1022 pages..... Price, \$5.00.

THE PUBLISHERS respectfully invite attention to the following notice, published in the weekly issue of the Standard Dictionary.

The execution of this Dictionary fully corresponds to its title.

The VOCABULARY is probably more comprehensive than that of all preceding English Dictionaries is compiled.

Classical references are added to ALL THE PROVERBS with respect to words now in vogue, and care is taken to note such as are technical, foreign, obsolete, provincial, or vulgar.

The DEFINITIONS are clear and exact, and those pertaining to technical and scientific terms are especially valuable to the general reader.

The author has carefully balanced great labor on every relation. His system of notation, which is easily understood, and founded on a more complete study of the several sounds than is to be elsewhere met with, together with his plan of exhibiting all the best English authorities in relation to words directly pronounced by different orthography, gives to this work important advantages as a standard work.

In ORTHOGRAPHY he has made no arbitrary changes, but where usage is various and fluctuating, he has aimed to be exact, and to reduce to the same rules, words of similar formation.

The insertion of GRAMMATICAL FORMS and INFLECTIONS OF WORDS to a much greater extent than they are given in other English Dictionaries, and the short critical notes on the orthography, the pronunciation, the grammatical form and construction, and the peculiar, technical, local, and American uses of words, are preserved through the volume, give to this work much additional value.

The copious VOCABULARY OF MODERN GEOGRAPHICAL NAMES, with their pronunciation, and a greatly enlarged and improved edition of Walker's key to the pronunciation of Classical and American Proper Names, are important appendages to the Dictionary.

A year has passed since this Dictionary was published; and its already extensive use, both among educated English readers, and men of wide learning, speaks good testimony of its merits. We cordially recommend it as containing as ample and careful view of the present state of our language.

JARED SPARKS, LL. D. *Member Professor of ancient and Modern History, Harvard University.*
JOHN M. EARN, LL. D. *Justice U. S. Supreme Court, Ohio.*

I cannot fully do the leading portions of the above recommendations, but I have had leisure to examine all the particulars referred to.

OF THE
American Air-tight
Cooking Stoves

WERE RETAINED, in stock by Gardiner & Co., in the show-rooms of six months and a large number have been sold by myself this city. This Stove is not equalled by any other in the United States, and the unparalleled sales it has met with fully bespeak its unequalled merits.

HOUSE-KEEPERS should be sure and examine this superior Stove, which has won the admiration of several thousand house-keepers of the season. It has more real and use in proportion than all others combined. The fire-brick top has been proved to be of great value in absorbing the steam and causing the bread to rise and bake light (equal to the house-bake oven). The brick found to be more durable than the iron top. It so equalizes the heat around the oven, and a crumbly even bake is produced in this stove than in any other stove known. It has a most perfect arrangement for roasting in front. The burner arrangement for broiling, boiling, roasting, &c., is complete. The grate elegantly stilted, discharging the ashes into the ash-pit. The flues are large, and arranged so as not to fill up with soot. It is superior to see how full an amount of fuel it requires to perform as great a variety of cooking in a pleasing appearance, substantial construction, and general good qualities, have set it forth to be **THE STOVE FOR THE PEOPLE!**
